DESIGN & BUILD

SNEF

internationally.

cognized player in the fields of electrical engineering, instrumentation and control systems. In the 80s, Snef diversified into other sectors of the Industry before conquering the Services and Telecommunications markets. Since then, its network of branch offices has expanded throughout France and

Created in 1905, Snef was founded on the Port of Marseille as a ship

electrician. It then developed its activities in France's ports and naval

dockyards. In keeping with its commitment to continuous improvement,

Groupe Snef increasingly turned to the industry sector and became a re-

Groupe Snef is established in Eastern Europe, Latin America and Africa through local subsidiaries.

With the acquisition of the Ekium Group, Groupe Snef has expanded its field of action in conception design and engineering.

With the integration of Fouré Lagadec, Groupe Snef has further enhanced its expertise in the field of industrial mechanical maintenance.

The creation of Snef Lab marks Groupe Snef's commitment to new technologies, support for the development of its historical activities.

Our strengths

Snef is an independent ISE (Intermediate-Sized Enterprise) located in Marseille. Its assets are agility, a spirit of economy, the absence of large speeches for an emphasis on fieldwork, and the belief that the success of the company takes precedence over the success of those who manage it.

Groupe Snef's strategy is simple; move up the value chain while preserving what has always been its strength: perfect knowhow of the trade in the field and at the service of its customers and partners.

Snef's business portfolio comprises a multitude of projects; treating each project as a stand-alone is what makes the overall success of the company.

Snef has always favored hiring, valued the work and considered that the company is the venue for economic development, job creation and the personal fulfillment of its employees.

Founded over 110 years ago, Snef remains a young company, turned towards the future, at the heart of the energy transformation and of the digital revolution.

WE ARE ENGINEERS/DESIGNERS, INTEGRATORS, MAINTAINERS AND OPERATORS OF MULTITECHNICAL SOLUTIONS IN THE FIELDS OF ENERGY, MECHANICS AND DIGITAL TECHNOLOGY. WE ARE CONSTANTLY REINVENTING OURSELVES AS PROMOTERS OF THE DIGITAL REVOLUTION, OF CONNECTED OBJECTS, BIG DATA, CYBERSECURITY, INDUSTRY 4.0, ARTIFICIAL INTELLIGENCE AND MIXED REALITY.

CYCLE

- Design & Engineering Integration Maintenance & Operations
 - Periodical Shutdown

Snef offers a wide range of multi-technical skills. With over 110 years of history, Snef has never been so young and dynamic. Always at the service of our historic business lines, we have leaped forward into the All-Digital age and the era of Connected Objects, Big Data, Artificial Intelligence and Industry 4.0.

Snef Power Services / EDF / Saint-Vulbas: Ten-year visit and technical shutdown of the Bugey nuclear power plant (General Electrical Installations).

Firac / Knauf Fibres / La Côte (70): Integration of a robotic solution for the production of wood wool for the manufacture of insulators

Snef Lab - Predict /Cma-Cgm / Marseille: Predictive solutions in anticipation of excess carbon emissions, of container ship performance losses and main engine malfunctions.

Snef / Chantiers de l'Atlantique / Saint Nazaire: Electricity work package for the construction of the offshore wind farm substation, the first French wind farm at sea.

Fouré Lagadec / Sorfert / Algeria: Construction of 2 gas/steam superheaters.

Ekium / Petroineos / Lavera: Maintenance of refinery units (studies and monitoring of works in EIA and all trades).

Snef / Caen University Hospital (UH) / Caen: Electrical engineering work package as part of the project to transfer and store part of the archives of Caen UH.

Snef Maintenance / Ugecam Saint-Didier-au-Mont-d'Or:

Multi-technical maintenance contract at the Val Rosay follow-up care and functional

rehabilitation center, managed by Ugecar

SNEF _ Electrical Engineering

Snef is the lead company of the Group. It encompasses all historic businesses of the Group: electrotechonology, industrial processes (instrumentation, control systems, automation), IT professions and telecommunications, service maintenance and environmental engineering.

Sheft The offer is more specifically towards Nuclear operators with our subsidiary Snef Power Services.

In 2017, Groupe Snef acquired stakes in Ekium, alongside three of its founders. Since then, Ekium has consolidated its positions with the takeover of Ateim, DI and Chleg Froté to become, with ISO Ingénierie, a company specialized in risk analysis, the local multi-technical engineering leader in the Industry sector.

Snef (PACA) - Snef Lab (Snef Audio-visual) Orange Velodrome Stadium: Stadium lighting and audio system replacement.

Snef - Snef Connect / Grand Port Maritime de Marseille: HV, LV work packages (video surveillance, access control, intrusion detection, fire detection, BMS) and HVAC for the restructuring project of the Cap Janet international passenger terminal.

Snef / SDIS / Wolfisheim: Wolfisheim Logistics center, safety of the three buildings.

Snef / City of Nice / Nice: Electricity work package (including energy storage), video surveillance, firre safety system, intercom system, BIM and Lean Construction ngineering for the Campus Sud des Métiers dedicated to work-study training programs

Watt Design & Build / La Française REM / Paris: Refurbishment and rehabilitation of an office building complex, PRM compliance and reduction of the building's environmental impact (building certified as "HEQ sustainable building" level Excellent).

Acquired by Groupe Snef in 2018, the Fouré Lagadec Group specializes in industrial mechanical maintenance, piping and boilermaking.

Fouré Lagadec is involved in maintenance, plant shutdowns and green field and brown field works for all industries.

Firac is a historic company of Groupe Snef. It has developed know-how in the fields of industrial automation, handling and later on robotics. It became a recognized player in the automotive, aerospace, pharmaceuticals and agri-food sectors... Clid, its subsidiary, is a painting process specialist.

From technical work packages, we have acquired expertise in the conceptional design and construction of facilities and have become a player in the renovation and redesign of office and retail spaces.

Watt Design & Build is at the same time a provider of intellectual services, from audit to workspace design and turnkey project developer. As such, Watt Design & Build offers comprehensive services to property owners and users.

Snef Lab integrates Snef Technologies, in the industrial IT and cybersecurity sectors: Snef Audiovisuel: Mios. for connected objects; Predict, specializing in predictive maintenance algorithms; Sequor, an Industry 4.0 software publisher; and of Brinel, IT architect.

Omnium Service / Cimencam Lafarge Holcim Cameroon /Douala Bonaberi: Execution of electrical works, control system and supervision of the handling workshop.

Our commitments

Groupe Snef owes its longevity to its model, which combines entrepreneurship, responsibility of economic players, agility and respect for a job well done.

We affirm our Intermediate Size Company status, independent, committed. We advocate simplicity in decision-making, the ability to adapt, a direct management approach – many assets to embark new talents on the Snef adventure.

Although independent, our rule has always been to hold ourselves to the highest standards.
